

APEX ENGINEERING GROUP
Engineering Flow, Designing Solutions

ARCHITECTURE & INTERIOR DESIGN

Company Profile

Welcome to the Architecture and Interior Design portfolio. As a professional freelancer associated with Apex Engineering Group, We specialize in transforming conceptual ideas into reality. From precise 2D technical planning and 3D BIM modeling to ultra-realistic, high end photo-realistic renderings, I provide end-to-end architectural solutions. Our design philosophy combines structural functionality with modern aesthetics, ensuring spaces that are not only beautiful but engineered to perfection.

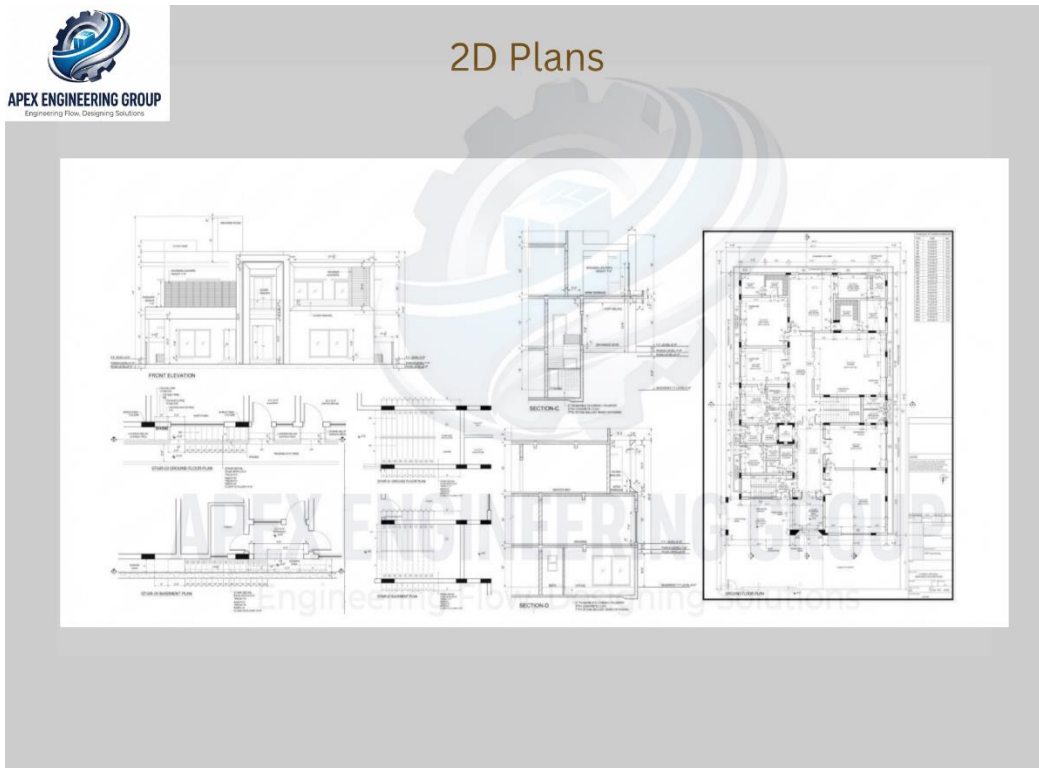

We would be pleased to support your project with professional, high-quality engineering and architectural solutions.

Best regards,

APEX ENGINEERING GROUP

What can we do?

1. **2D Drafting & Layouts:** Detailed floor plans, site plans, structural sections, and elevations.
2. **3D Modeling & BIM (Building Information Modeling):** Full-scale digital 3D models with integrated data for multi-story residential and commercial buildings using industry-standard tools like Revit.
3. **Exterior Architectural Design:** Modern residential houses, high-rise luxury towers, and commercial complex facades.
4. **Premium Interior Design & Visualization:** Luxury bedrooms, modern kitchens, spa-like bathrooms, and spacious living areas.
5. **Photo-Realistic Renders:** High-end CGI rendering with realistic lighting, textures, material finishes, and landscape design.

2D & 3D Plans

RESEDENTIAL PROJECTS

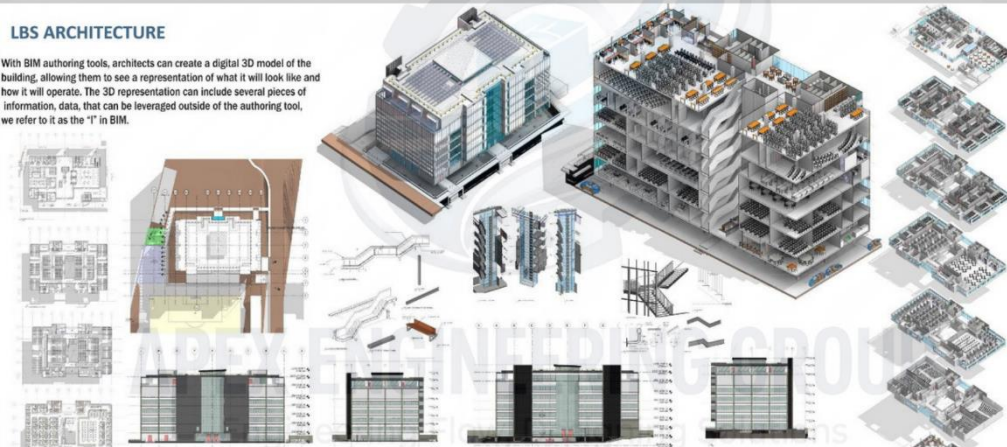

Software: Revit
-Plan
-3D
-Sections
-Walkthrough

2D & 3D Plans

LBS ARCHITECTURE

With BIM authoring tools, architects can create a digital 3D model of the building, allowing them to see a representation of what it will look like and how it will operate. The 3D representation can include several pieces of information, data, that can be leveraged outside of the authoring tool, we refer to it as the "I" in BIM.

Portfolio Breakdown

1. Technical Drafting & 2D Engineering Plans:

- **Description:** Comprehensive technical documentation including Front Elevations, Cross-Sections (Section-C, Section-D), and detailed ground floor and basement layouts.
- **Key Features:** Precise staircase details, room dimensions, wall thickness scheduling, and regulatory compliance layouts.

2. 3D BIM & Revit Projects (Residential & Commercial Architecture):

- **Description:** Advanced Building Information Modeling (BIM) where architectural concepts meet digital execution.
- **Key Features:** * Multi-family residential project plans with detailed walk-through readiness.
 - Complex multi-story building systems (LBS Architecture) showcasing floor-by-floor seating arrangements, staircase designs, structural framing, and curtain wall engineering.

3. High-End Exterior & Tower Views:

- **Description:** Spectacular architectural renderings highlighting exterior structural beauty and material selection.
- **Key Features**
 - **Modern Residential Villas:** A-frame contemporary cottages and minimalist luxury villas featuring private pools, sun lounges, and seamless indoor-outdoor integration.
 - **Urban High-Rise Towers:** Eco-friendly, green-balcony integrated skyscraper designs optimized for modern urban living.

4. Photo-Realistic Interior Design Masterpieces:

- **Description:** Ultra-realistic interior spaces crafted with a focus on luxury, warmth, and optimal space utilization.
- **Key Features:**
 - **Luxury Master Bedrooms:** Modern accent walls, hidden ambient lighting, custom wardrobes, and elegant wooden panelling.
 - **Gourmet Kitchens:** High-end modular cabinets, marble-top islands, integrated appliances, and large glass windows for natural lighting.
 - **Spa-like Bathrooms:** Minimalist designs featuring freestanding bathtubs, floating vanities, gold-accented mirrors, and custom glass shower enclosures.
 - **Open-Concept Living & Dining:** Large spatial layouts with premium furniture, artistic light fixtures, and floor-to-ceiling windows overlooking lush green landscapes.

Software & Tools Expertise

- Autodesk Revit (BIM Modeling, Sections, Walkthroughs)
- AutoCAD (2D Plans, Elevations)
- SolidWorks & Ansys Fluent (For advanced engineering flow/CFD if required)
- High-End Renderers (V-Ray / Lumion / Twin motion / Corona for Photo-Realism)
